Israel's critical role in the future of AI

As the AI Week 2022 conference continues, Israel and the AI community deliberate upon the future of one of the most influential technologies in the current era.

THE JERUSALEM POST

Paving the Road Toward Explainable & Responsible AI

This week, the Blavatnik Interdisciplinary Cyber Research Center at Tel Aviv University put on a virtual AI conference for data scientists and AI professionals. Reuven Shnaps, a featured speaker from the conference, reflects on the importance of ethics in AI, as the industry continues to grow

Geektime

IDF reveals its artificial intelligence war data 'factory'

"Data and AI can actually win wars... not only arms, physical jets and submarines," said Brig.-Gen. Aviad Dagan.

THE JERUSALEM POST

We must prepare our homework in Artificial Intelligence

"Our lives are being increasingly affected by Artificial Intelligence systems, we should integrate the acquaintance with this technology into Israel's education system," writes Dr. Amitai Armon, Chief Data Scientist, IT AI Group, Intel
